

Building a cleaner, renewable and sustainable future

LOCAL IMPACT

NEXT Renewable Fuels is investing more than **\$2 billion** at Port Westward in Columbia County.

NEXT will generate more than **\$45 million per year in local property tax revenues**, and pay more than **\$5.5 million in Port fees**.

At Port Westward, NEXT has secured **116 properly zoned acres** through purchase and long-term lease.

Projected to directly create more than **240 full-time, family-wage jobs**, the facility will generate almost **\$40 million per year in direct and in direct labor income**.

ENVIRONMENTAL IMPACT

NEXT is planning a facility that can produce more than **50,000 barrels per day** of Renewable Diesel (RD) and Sustainable Aviation Fuel (SAF) at full capacity.

90% of the facility's output will be NEXT's RD and SAF true drop-in replacements for petroleum-based fuels.

Currently, the U.S. produces 450 million barrels of biofuels each year. Demand is expected to reach **600 million barrels in the next 15 years**.

In 2018, a **3.1% increase** in demand for traditional diesel drove an overall spike in greenhouse gas emissions in the U.S.

By reducing life-cycle greenhouse gas emissions by up to 80%, NEXT will be capable of creating emissions savings equal to **removing more than 1 million automobiles from the road every year**.

RD and SAF are **100% renewable** and sustainable.

NEXT STEPS

NEXT plans to **complete permitting** in 2023.

Construction is expected to require **2 million labor hours**. NEXT's facility is scheduled to **open in 2025**.
